## Glasgow Coma Scale

**Activity**                          | **Score**
---                                | ---

### EYE OPENING
- None 1 = Even to supra-orbital pressure
- To pain 2 = Pain from sternum/limb/supra-orbital pressure
- To speech 3 = Non-specific response, not necessarily to command
- Spontaneous 4 = Eyes open, not necessarily aware

### MOTOR RESPONSE
- None 1 = To any pain; limbs remain flaccid
- Extension 2 = Shoulder adducted and shoulder and forearm internally rotated
- Flexor response 3 = Withdrawal response or assumption of hemiplegic posture
- Withdrawal 4 = Arm withdraws to pain, shoulder abducts
- Localizes pain 5 = Arm attempts to remove supra-orbital/chest pressure
- Obey commands 6 = Follows simple commands

### VERBAL RESPONSE
- None 1 = No verbalization of any type
- Incomprehensible 2 = Moans/groans, no speech
- Inappropriate 3 = Intelligible, no sustained sentences
- Confused 4 = Converses but confused, disoriented
- Oriented 5 = Converses and oriented

**TOTAL (3–15): _____**

### References
